

PRODUKT: **Small surge protector for 230VAC power line**

MODEL: **SUG-5**

SUG-5 is miniature surge protector designed for devices powered 230VAC.

Small dimensions allows installation i the CCTV camera housing, connection boxes, or electrical outlets.

It protects power line against voltage increase arising lightning discharges, damages, or connection errors in electrical installations. The products always should be used with other surge protector installed on power line inputs of the building and with fuses up to 16A maximum.

Technical specification:	
Connection	Between LINE and NEUTRAL
Protection layers	One
Maximum protection	4kV
Maximum voltage line-line	250VAC
Protection level Up	600VDC
Discharge current	10kA @ 8/20us 2.5kA @ 10/350us
Operation temperature	-30 ~ 60°C
Housing tightness	IP40
Dimensions	L:32,5mm x D: 12 (mm)
